

**MEASURING TECHNIQUES
FOR
TRANSONIC AND SUPERSONIC FLOW
IN CASCADES AND TURBOMACHINES**

PROCEEDINGS OF THE 7TH SYMPOSIUM RO-1694
HELD IN AACHEN ON SEPTEMBER 21-23, 1983

Editors: K.-D. Broichhausen · H. E. Gallus

Mitteilung Nr. 84-01

Institut für Strahlantriebe und Turboarbeitsmaschinen
Rheinisch-Westfälische Technische Hochschule Aachen

Aachen, Dezember 1984

List of the Previous Meetings
 List of Participants

REFERENCE

SESSION I

PLANE AND ANNULAR CASCADES WITH FIXED AND
 VIBRATING BLADES, COMPRESSOR TEST RIGS

- * Rotor Exit Flow Measurements in a Single Stage
 High Speed Axial Compressor
 F. Neuhoff, R.P. Shreeve 1
- * The Use of an Extensive Rapid Response Data Reduction
 to Restore the Flow Characteristics at the Outlet of
 a Centrifugal Rotor
 G. Bois, A. Vouillarmet 2
- * Measurement Methods for Evaluating Static Pressures
 from Rotating Annular Cascades
 H.-J. Heinemann, W. Braeunling 3
- * An Aeroelastic Testing Technique in a Straight Cascade
 Wind-Tunnel
 E. Szechenyi, J.P. Girault 4

SESSION II

BOUNDARY-LAYER MEASUREMENTS

- * The Detection of Boundary-Layer Transition and Separation
 in High Speed Turbine Cascades
 H.P. Hodson 5
- * On the Accuracy of Boundary Layer Measurements in Cascades
 at High Subsonic Flow
 M. Hoeger, H. Hoheisel 6

SESSION III

OPTICAL METHODS

- * Comparison of a Computed Transonic Flow and Interferometric Measurements around the Leading Edge of a Two Dimensional Aerofoil Asymmetrically Mounted in a Wind Tunnel
P.J. Bryanston-Cross, J.D. Denton 7
- * Development of a Laser-Density-Gradient Technique for the Measurement of Unsteady Flow Phenomena
K.-D. Broichhausen, J.-M. Henne, H.E. Gallus 8

SESSION IV

PROBE CALIBRATION CHANNELS

- * Development of a Perforated Nozzle for Calibrating Transonic Probes
N.C. Baines 9
- * A Transonic Steam Channel for Probe Calibrations
D. Granser 10

SESSION V

WET STEAM

- * Low Cost Pressure Transducers: Accuracy and Calibration
R. Decuyper, W. Bosschaerts 11
- * Preliminary Trials With a Variable Geometry Supersonic Test Section in CERL Wet Steam Tunnel
N.B. Wood, R.W. Langford, V.M. Morton 12
- * Measurement of Droplet Size Distribution and Velocity Vectors in Two Phase Flow With a Light Scattering Technique
G. Dibelius, H. Voß 13

SESSION VI

PROBE CALIBRATION AND -MEASUREMENTS

- * Measuring Errors of Pneumatic Multi-Hole-Probes
A. Heneka, H. Bubeck 14
- * Investigation of the Reynolds Number Effect on Two Pressure Probes for Measurements in Turbomachines
O. Novak 15

REFERENCE

- * Calibration and Use of ONERA Five Hole Probes
R. Gaillard 16
- * Measurement of Unsteady Pressure Fluctuations Using
Capillary Tubes
G. Dibelius, G. Minten 17
- * Instantaneous Three-Dimensional Flow Measurements
With a 4-Hole Wedge Probe
A. Heneka 18
- * Some Aspects of Semiconductor-Probe Development
K.-D. Broichhausen, G. Kauke, Shi Zhi-da 19

APPENDIX

- Presentation of Special Measuring Techniques 20

iii
