2 - 4 September 1998

TABLE OF CONTENTS

KEY NOTE ADDRESSES

“What Should We Measure?
The Aero-Engine Turbine Aerodynamic Perspective”.
Dr Martin Rose, Rolls-Royce, Derby, U.K.

“What Should We Measure?
The Industrial-Engine Turbine Heat Transfer Perspective”.
Dr Bernhard Weigand, ABB, Switzerland.

SESSION 1: TURBINE/COMPRESSOR AERODYNAMICS I

Session Chair: Dr A. Niven, University of Limerick.

Experience with a Double-Hot-Wire Aspirating Probe in a Transonic Turbine Stage
Brouckaert, J.F., VKI, Belgium.

Analysis of a Trailing Edge Vortex Shedding in a Turbine Inlet Guide Vane with Endwall Contouring
Riccio, G.; Michelassi, V.; Manfrida, G., University of Florence, Italy.

SESSION 2: TRANSDUCERS I

Session Chair: Professor C. Sieverding, VKI, Belgium.

Numerical Predictions in Support of Thin film Aerodynamic Shear Stress Calibration
Niven, A.; O'Donnell, F.K.; Fitzgerald, J.; Davies, M., University of Limerick, Ireland.

Correction of Time-Dependent Aerodynamic Measurement Errors of Fast-Response Probes
Gizzi, W.P.; Gyarmathy, G., ETH, Switzerland.

Unsteady Temperature and Pressure Measurement Using Optical Fibre Aerodynamic Probes
*Barton, J.S.; Kilpatrick J.M.; MacPherson W.N.; Jones, J.D.C., Heriot Watt, U.K.;
Chana, K.S.; Anderson, J.S., DERA Pyestock, U.K.; Buttsworth, D.R.; Jones, T.V., Oxford University,
U.K.*

SESSION 3: OPTICS I

Session Chair: Professor T. Fransson, Royal Institute of Technology, Sweden.

A Stereoscopic PIV System for the Investigation of the Flow in an Internal Coolant Passage
Schabacker J.; Bölcs A., EPFL, Switzerland.

The Transient Liquid Crystal Technique Employed for Sub-and Transonic Heat Transfer and Film Cooling Measurements in a Linear Cascade
Reiss, H.; Bölcs A., EPFL, Switzerland; Drost, U., ABB, Switzerland.

Application of Three Dimensional Laser-Two-Focus Anemometry to Transonic Turbine Flows. Example of an Isolated Stator
Freudenreich, K.; Fransson, T.H., Royal Institute of Technology, Sweden.

SESSION 4: TRANSDUCERS II

Session Chair: Dr H. Hodson, Cambridge University, U.K.

A Novel Approach to the Use of Fast Response Aerodynamic Probes

Dambach, R.; Hodson, H.P., Whittle Laboratory, Cambridge University, U.K.

Development of a Fast Response 3 - Hole Pressure Probe

Brouckaert, J.F.; Sieverding, C., VKI, Belgium; Manna, M., Università Degli Studi di Napoli 'Federico II', Italy.

Examination of Changes in Wedge-Probe Characteristics When Varying the Boundary Conditions

Seibold, A.; Renner, M.; Stetter, H., Universität Stuttgart, Germany.

SESSION 5: BLADE EXCITATION

Session Chair: Professor T. Fransson, Royal Institute of Technology, Sweden.

Blade Vibration Instrumentation to Validate Against Non Integral Engine Order Excitation in a High Pressure Compressor

Baumgartner, M., BMW Rolls-Royce, Germany; Kameier, F., University of Applied Sciences, Düsseldorf, Germany.

Aerodynamic Excitation of Transonic Turbine Stages; Experimental Investigation of the Blade Frequency due to the Shockwave Frequency

Urban, B.; Stetter, H., Universität Stuttgart, Germany; Vortmeyer, N., Siemens AG, Germany.

Unsteady Wall Pressure Measurements with Vibrating Blades in an Annular Channel

Körbächer, H., EPFL, Switzerland.

SESSION 6: OPTICS II

Session Chair: Professor C. Sieverding, VKI, Belgium.

The Application of Thermal Imaging Techniques to Measure Heat Transfer in a Pre-Swirl Nozzle Ring

Daguze, F.M.; Lock, G.D.; Wilson, M., University of Bath, U.K.

SESSION 7: TRANSDUCERS III

Session Chair: Dr Roger Ainsworth, Oxford University, U.K.

Temperature Measurement in the Exhaust Gas Flow of a Turbohaft Engine

Fiedler, K.; Andrick, O., Universität der Bundeswehr, Hamburg, Germany.

Three Dimensional Hot Wire Anemometry Using a Weakly Intrusive Probe in a Turbomachine Comparison with LDV

Michon, G.-J.; Miton, H.; Pradère, T., Laboratoire d'Énergétique et de Mécanique des Fluides Internes, Orsay, France.

SESSION 8: TURBINE/COMPRESSOR AERODYNAMICS II

Session Chair: Professor Zunino, Università Degli Studi di Genova, Italy.

Secondary Flow Measurements in a Gas Turbine Cascade by a 3-D Pneumatic Probe

Contini, D.; Manfrida, G.; Michelassi, V., University of Florence, Italy.

A Measurement Technique to Investigate the Influence of Surface Roughness on the Flow around a Highly Loaded Compressor Cascade

Leipold, R.; Fottner L., Universität der Bundeswehr München, Germany.

Boundary Layer Investigations in the Transonic VKI-1 Cascade

Svensdotter, S., Royal Institute of Technology, Sweden; Johansson, U., Volvo Aero Corporation, Sweden; Fransson, T.H., Royal Institute of Technology, Sweden.

SESSION 9: FACILITIES

Session Chair: Dr H. Hodson, Cambridge University, U.K.

Experimental Investigation of the Boundary Layer in a Heat Exchanger Model Equipped with Square Ribs

Cattanei, A.; Cipriani, F.; Ubaldi, M.; Zunino, P., Università di Genova, Italy.

A New Annular Sector Cascade Test Facility to Investigate Steady-State Cooling Effects

Wiers, S.-H.; Fransson, T.H., Royal Institute of Technology, Sweden.

Experimental Setup for Catalytic Combustion of Gasified Biomass Design and First Results

Jacoby, J.; Hofer, M.; Fredriksson, J.; Fransson, T.H., Royal Institute of Technology, Sweden.

Pressure and Strain Instrumentation for a Continuous Flow Turbine

Byrne, C.; Clothier, S.; Davies, M., University of Limerick, Ireland.

SESSION 10: TURBINE/COMPRESSOR AERODYNAMICS III

Session Chair: Professor Zunino, Università Degli Studi di Genova, Italy.

The Use of Simultaneous Surface Hot Film Anemometry to Investigate Unsteady Wake Induced Transition in Turbine and Compressor Cascades

Brunner, S.; Teusch, R.; Stadtmüller, P.; Fottner, L., Universität der Bundeswehr, München, Germany.

Wide Bandwidth Measurements in a Transonic Steam Wake Flow

Bosschaerts, W., Royal Military Academy, Brussels, Belgium.

Influence of Flow Coefficient on the Turbulence Characteristics in the Flow Behind a Rotor Blade Row of an Axial Compressor Stage

Witkowski, A.S.; Chmielniak, T.J.; Strozik, M.D.; Majkut, M.M., Silesian Technical University, Poland.

SESSION 11: TRANSDUCERS IV

Session Chair: Dr Roger Ainsworth, Oxford University, U.K.

Some Considerations on Using Miniature Pressure Sensors in Fast-Response Aerodynamic Probes for Flow Temperature Measurements

Kupferschmied, P.; Roduner, C.; Gyarmathy, G., ETH, Switzerland.

Measurements of the Local Heat Transfer Coefficients of Complex Industrial Wall Cooling Problems

Urban, M., Siemens AG, Germany.

SESSION 12: TRANSDUCERS V

Session Chair: Dr. A. Niven, University of Limerick

Analysis of the Error Propagation Arising from Measurements with a Miniature Pneumatic 5-Hole Probe

Treibor, M.; Kupferschmied, P.; Gyarmathy, G., ETH, Switzerland.

Direct Measurement of Energy Separation in Vortical Trailing Edge Wake Flows Using a New Wide Bandwidth Total Temperature Probe

Hogg, S.I., ALSTHOM Energy Ltd., U.K.; Gostelow, J.P., University of Leicester, U.K.:

Carscallen, W.E., Institute for Aerospace Research, Canada.

Some Consequences of the Use of a Pulsed Neodymium YAG Laser as Illumination Source for Doppler Global Velocimetry Measurements

Thorpe, S.J.; Ainsworth, R.W., Oxford University, U.K.
